## ANTONYO MAREST

### Solo Show: 'THE GOLDEN STATE'

#### ARTIST STATEMENT

The golden state- the state of the sun.

Antonyo Marest explores the contrasts of the sunrises of this part of our country in order to create a tropical sensation but with an urban edge - with the idea that sometimes less is more, and a burst of colours and pure lines that come together to make this exhibition difficult to forget.

#### ABOUT

Now residing in Madrid, Antonyo has travelled the globe, absorbing graphic culture from America to central Europe and has shown creativity and ingenuity in many creative fields, from painting, sculpture,

photography, street art, graffiti and graphics to furniture and clothing design.

The geometric figure is among the most important motifs represented in his work, a symbol that speaks about "personal growth and positivism" as well as "the struggle and communion of styles, movements and trends in art".
